

iCog Labs Artificial Intelligence Guideline

Introduction

Welcome to iCog Labs! Founded in April 2013 by Ethiopian entrepreneur Getnet Aseffa Gezaw and cognitive scientist Dr. Ben Goertzel, iCog Labs is East Africa's first private AI and Robotics R&D company. We specialise in artificial intelligence, focusing on areas like machine learning, computational linguistics, computer vision, mobile robotics, and artificial general intelligence. Our team of software and business development experts is dedicated to advancing science and technology for the benefit of humanity, with a commitment to using innovative AI to help Africa make strides into the future.

This handbook is designed to introduce you to our values, processes, and the resources available to support you. It provides clear guidance on your responsibilities, rights, and opportunities so you can navigate your internship confidently as you begin your journey with us.

Internship Objectives

The iCog Labs Internship Program is designed to provide hands-on experience in artificial intelligence, machine learning, robotics, and blockchain while fostering collaboration with industry professionals on innovative projects. Our objective is to support personal and professional growth, identify dedicated individuals, and evaluate their potential for joining our team. Interns will engage in meaningful work that challenges them to apply their skills and learn new ones, all while contributing to groundbreaking solutions that advance technology.
This program also offers networking opportunities to connect with peers and mentors, creating a supportive environment for future career development.

Rights and Responsibilities

You have the right to:

- Choose a mentor to guide you throughout your internship.
- Change mentors if necessary, with proper notification to HR.
- Report any workplace issues to the HR team.

Responsibilities include:

- Dedicating at least 40 hours per month in the office.
- Attending mandatory training sessions and completing five required courses.
- Updating your CV regularly, as it will be reviewed weekly. You can review the CV Guideline Carefully
- Respecting confidentiality regarding company information and proprietary data.
- Maintaining a professional demeanour, including decency in all interactions.

Teams and Departments

At iCog Labs, interns have the opportunity to join various teams and departments, allowing them to work on diverse projects and gain valuable experience. Each team focuses on different areas of innovation and technology, encouraging collaboration and knowledge sharing.

Available Teams:

- **Mindplex**
- **Rejuve Bio**
- **Hyperion Mosse**
- **Hyperion Pattern Minor**
- **NAC**
- **Conceptual Blending**
- **Hyperon OpenPsi**
- **Quantum computing Team**
- **AI Video Generation**
- **Qwestor**
- **Continual Learning**
- **Subrep project**
- **MusicAI**
- **MathematicsAI**
- **Cordinal Miner**
- **HyperClaw**
- **SophiaVerse: Games AI**
- **Hopefield**

To find out more about each team, please click on the links provided.

Training Sessions and Courses

As part of your internship at iCog Labs, you will participate in structured training sessions designed to enhance your skills and knowledge in various fields. These sessions will take place regularly, typically on Saturdays, and will cover essential topics relevant to your role, following the Training Guideline.

Training Sessions:

- Attend all scheduled training sessions to maximise your learning and engagement.
- Training will be conducted by staff members, and your performance will be graded based on attendance and engagement.

Mandatory Courses:

- Complete six mandatory courses throughout your internship to support your professional development.
- Course topics will cover essential skills and knowledge areas in artificial intelligence, machine learning, robotics, and more.
- **Course Suggestions:** Mentors may provide additional course suggestions to further enhance your learning experience. You can find the suggestions here
- **Project Guide: Course Recommendations** - To help you choose the right team, this document offers tailored course recommendations for each project. You can find it here
- **AGI course recommendation material**- this Curriculum material helps your path to AGI engineer/ researcher. here

Performance Evaluation

Your overall performance and attendance during the internship will determine your grouping for evaluation purposes. Being the top 5 in group 1 indicates that you are active and dedicated, which is a positive sign for consideration during the intern-to-staff transition evaluation.

To ensure you gain the most from your internship experience, actively engage in all training sessions and courses provided.

Professional Development Opportunities

At iCog Labs, we are dedicated to your growth through various professional development opportunities. You'll connect with industry professionals at networking events, participate in specialised workshops, and benefit from mentorship. Regular feedback sessions will help you track your progress and enhance your skills, preparing you for a successful career in technology.

Communication and Reporting

Effective communication is essential for a successful internship experience at iCog Labs. Interns are encouraged to maintain open lines of communication with their mentors and team members. Regular updates on project progress and any challenges faced should be reported promptly. Utilise official channels for communications, and ensure that all relevant documentation is submitted on time. This practice not only fosters collaboration but also enhances your professional development.

Key Contacts

For any questions or support during your internship at iCog Labs, please reach out to the following key contacts:

- **HR Team:** For inquiries related to your internship, mentoring, and workplace concerns contact icoglabs89@gmail.com. If you experience difficulties and your case is not addressed to your satisfaction, you can contact the HR head team for further support by emailing icoghrteam1@gmail.com.
- **Mentor:** Your designated mentor will provide guidance and support throughout your experience.
- **Team Leads:** For project-specific questions or collaboration needs, contact your respective team lead.

Ensure you have these contacts readily available for a smooth internship experience.
